Markham, Ontario

L3R 0E1

This letter is to confirm the authenticity of the numbering sequence for the five different bullion deeds printed and inspected in our Calgary plant. Each certificate was individually checked prior to shipping to assure the accuracy of each of the numbering sequences produced. It was verified that all numbers were present and there were no duplicate numbers in any of the deeds produced. The following documents were produced with their corresponding number sequences.

Silver - 00400000 to 00401499

Gold 100 ounce - 00200000 to 00200499

Gold 400 ounce - 00300000 to 00300499

Gold kilogram - 00100000 to 00100999

Platinum 50 ounce - 00500000 to 00500499

We take pride in assuring our clients that security procedures are followed every time to guarantee the accuracy of each certificate that leaves the facility.

Yours truly

Mark Fenton
